

Thematic Workshop – TWS2

The Monitoring process of Sustainable Energy Action Plans

Tools and methodologies for an effective monitoring of SEAPs and its implementation

Plovdiv, 21 May 2015

Venue: Prof. Arch. YOLOV Hall, Trimontium Princess Hotel, Plovdiv, Bulgaria

The Sustainable Energy Action Plan (SEAP) represents the key document of the Covenant of Mayors initiative, launched by the European Commission in 2009 in order to promote the 20-20-20 European targets among the municipalities all over Europe. More than 6290 municipalities joined the CoM until now, involving more than 197 millions of inhabitants in the initiative.

Through SEAPs the local authorities identify some measures aimed at reducing the CO₂ emissions and final energy consumptions of their territory within 2020 compared to a baseline year.

Monitoring and reporting phase is essential in order to ensure a continuous improvement of the process, also because the SEAPs is a dynamic tool that can be changed, enriched and adapted to the objectives and the needs of the municipality involved. A key aspect of this monitoring phase is the access to local and accurate energy data in order to better identify trends and priority sectors and measures of SEAPs.

This workshop, organized thanks to the DATA4ACTION project, aims to provide a framework of useful tools and case studies, focusing especially on local energy data issues, to all the stakeholders involved in the SEAPs implementation and monitoring process such as municipalities, technical experts, politicians and energy agencies.

Simultaneous translation will be available (English/Bulgarian).

The Monitoring process of Sustainable Energy Action Plans

Tools and methodologies for an effective monitoring of SEAPs and its implementation

	Topic	Presentation by
09:30 – 10:00	Registration	
10:00 – 10:30	Welcome, and outline of the daily agenda	Liyana Adjarova, EAP
SESSION 1: Local data for energy planning – SEAPs Monitoring - State of art and case studies		
10:30 – 10:50	Introduction SEAP Monitoring	Elodie Bossio FEDARENE/CoMO
10:50 – 11:30	Concrete examples of Municipalities that have already prepared the monitoring report Q&A	Municipality of Mezdra, BG Municipality of Genoa, IT
11:30– 12:30	Implementing regional/provincial support schemes for the monitoring of local SEAPs. The example of ELENA funds Q&A	PROSPER (ELENA by Province of Savona) and 2020Together (MLEI by Province of Turin)
12:30 – 13.30	Lunch Break	
13:30 – 13.50	How to implement a good monitoring? Benchmarked indicators, tools and cases	Albana Kona, JRC
SESSION 2: Local data for monitoring of integrated plans / SEAPs Monitoring in Action		
13:50 – 15:00	Energy databases and observatories for SEAPs monitoring and benchmarks of excellence. Shining practices for energy databases useful for monitoring SEAPs	NENET, EVE –IHOBE, RAEE
14.00 – 15.30	Common policies for local energy planning, air quality and GHG. Developing Energy and Environmental Observatory in Plovdiv	Ina Karova, EAP
15:30 – 16:00	Closing discussion of the day and good bye coffee	
16:00 – 17:00	Study Visit: 1) Laboratory for Research and Certification of solid biofuels and compost 2) Real-time Air Quality Modelling Mobile Laboratory	
<u>*Please, notify us in advance through the Registration Form in which of the two Study visits you would like to participate</u>
